Hippo Jobs

Hippo Jobs specialises in part-time and casual jobs for 15+ year olds.

Hippo has been designed to make life easier for young Australians. It has been developed to suit the habits of the 15+ year olds and address the issues they face when looking for a job. Hippo is a service dedicated to them and the types of jobs they are looking for matching employers and employees needs.

Based on their interests, activities and desires, potential employees can create a personal profile that presents far more about them than a resume alone, giving employers greater insight into who they might appoint.

Hippo will convert this information into a resume which can be saved, printed and emailed for any use. Further, it allows the most advanced applicant filtering system for employers on the job advertising market.

It's easy, with the help of Hippo

With the help of Hippo, which assists job searchers to build their own individual profile, securing a part-time or casual job has never been easier.

Furthermore with Hippo, job opportunities or advertisements are presented to provide the potential applicant with as much information as possible in order to make an informed decision about whether the position will suit them and if they would be a suitable applicant.

This is a mutually beneficial system – saving the employer time and effort during the selection process.
